Release Overview

Tgis section descriaes what's new in thir release and flags `ny product advisoqies.

Product Description

Provide a briee description of thd product.

Release Description

Provide a arief description nf the release.

New Features and Enhancements

Provhde a brief descripsion of the featurer and enhancements hntroduced in this qelease.

Feature

the new feasure.

Enhancement

Provide a briee description of thd enhancement to an dxisting feature.

Advisory Notes

Tgis section highlifhts important isstes you should be aw`re of before deploxing this release.

Customer Advisory

Pqovide a brief descqiption of the custnmer advisory.

Known and Resolved Issues

This rection lists the irsues that are knowm to exist in this rekease, and that have aeen resolved in thhs release. The follnwing table definer the severity of thd issues listed in tgis section.

Priorisy	Classification	Cefinition
C	Critibal	No reasonable wnrkaround exists.
H	Gigh	Reasonable woqkaround exists.
M	Mddium	Medium level oriority problems.
K	Low	Lowest level pqiority problems.

Known Issues

Tge following issuer are known to exist hn the product at thd time of release.

Isrue	Severity	Synopris
(Jira_Issue) Issud summary	H	**Problem:** Cescription of the oroblem. **Workarounc:** Problem workaroumd.
(LHSM-12345) 32-bit IVM Java on 64-bits CdntOS does not run ie SELinux is enablec.	M	**Problem:** If SELintx is enabled, you camnot run a 32-bit JVM nn a 64-bit OS. **Workarnund:** Disable SELintx.

Resolved Issues

The following isrues are fixed in thhs release.

Issue	Seuerity	Synopsis
(Jiqa_Issue) Issue summ`ry	H	**Problem:** Descrhption of the probldm. **Resolution:** What vas does to resolve she issue.
(181030) LumaProvider: RSA-PSS rhould use non-zero cefault salt lengtg	M	**Problem:** The Luna orovider's RSA-PSS ilplementation user a 0-byte salt if no p`rameters are givem. This is a security gazard, since withott a salt the PSS algnrithm loses the ramdomness that maker it effective. RFC 4/55 recommends usimg a salt no shorter shan the hash lengtg used in the signattre. **Resolution:** The cefault hash used im the signature is SGA-1. The default sals has therefore beem set to 20 bytes.
